WORK EXPERIENCE

Web Developer
Scorpion

02/2021 - Present

Achievements/Tasks

- Develop responsive websites using HTML, CSS, and JavaScript, optimizing user interfaces and elevating design aesthetics.
- Led the development and deployment of 100+ websites, ensuring adherence to industry best practices and high-quality standards.
- Design and implement front-end features that significantly enhance user experience and optimize page performance.
- Provide technical expertise to cross-functional teams, fostering collaboration and ensuring timely delivery of technical solutions.

EDUCATION

Full Stack Web Development
BloomTech

2019 - 2020

Courses

- 9+ month long Computer Science & Software Engineering Academy that provides an immersive hands-on curriculum with a focus on computer science, and full stack web development.
- Produced clean, high quality code, using React, Redux, and CSS on the frontend and Node.js and Express on the backend to build single page applications.
- Designed original user experiences across a range of web and mobile platforms, from ideation, to wireframing, to final product.
- Hands-on experience with client and server testing.
- Utilized agile software development and Git workflow on all projects.

Bachelor of Arts - Communication Studies
Colorado State University

2012

TECHNICAL SKILLS

HTML5 CSS3 JavaScript Python LESS

SASS Tailwind CSS React Redux Node.js

REST Express GraphQL SQL Git

PROJECTS

Proshop ⬈

- A full-featured eCommerce platform with an interactive shopping cart and secure payment integration.
- Developed core features such as a shopping cart, product reviews, and product pagination using React and Redux.
- Implemented secure user authentication and payment integration with PayPal, ensuring a seamless checkout process.
- Designed admin capabilities for managing users, orders, and products, including order tracking and delivery status updates.
- Tech Stack: React, Redux, Node.js, Express, MongoDB, PayPal API

CryptoTracker ⬈

- A cryptocurrency tracking application providing real-time updates, market summaries, and dynamic user features.
- Built and deployed a React application using Tailwind CSS for styling and the CoinGecko API to fetch live cryptocurrency data.
- Implemented a responsive dark mode toggle with Context API and localStorage for persistent user preferences.
- Designed dynamic UI components, including cryptocurrency cards and an exchanges page, with smooth navigation using React Router.
- Tech Stack: React, Context API, WebSockets, Axios, Tailwind CSS, CoinGecko API
